

Interconnection Box Type T – CXIT (Line MCDPR)

PRODUCT: CXIT-E-MCDPR-C0-K2

TECHNICAL SHEET 1/2

☎ Customer Service: 55 11 3019-1616

See the Installation Manual for further details

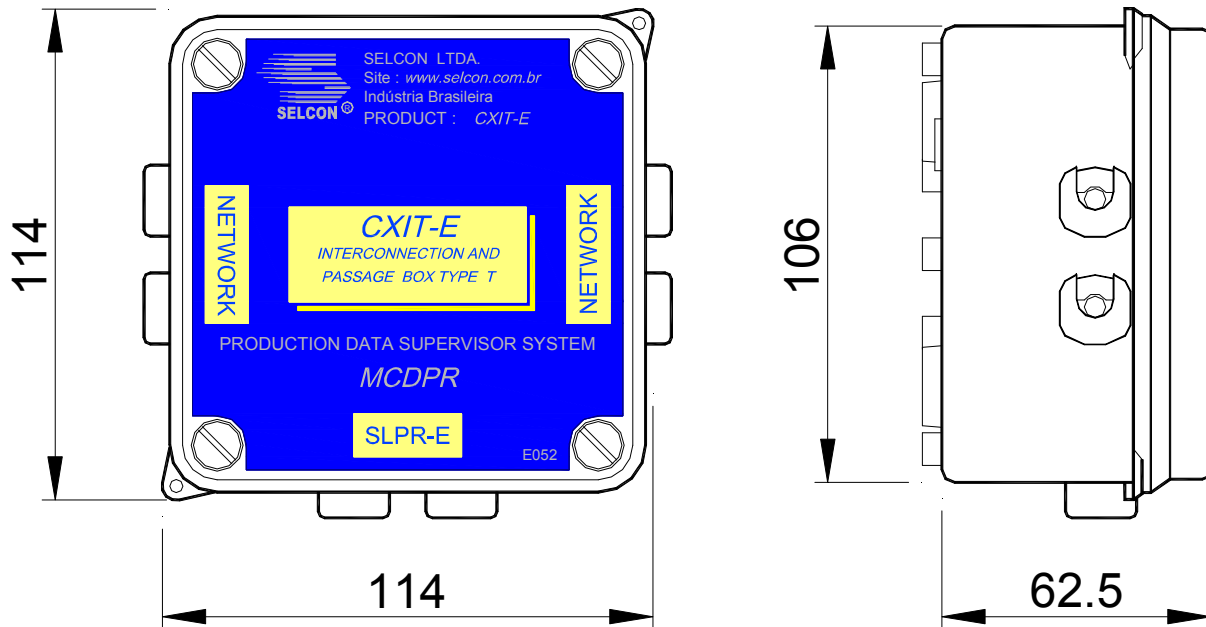

• DESCRIPTION

The interconnection and passage box type T, CXIT-E, permits the interconnection of power supply cables and communication from the FCCM-E equipment (communication power source and converter) with the SLPR-E (data supervisor), as well as the interconnection of this SLPR-E with others in the same power supply and communication line.

• CXIT-E TECHNICAL DATA

- Interconnection terminal bars for power supply cables, communication, and ground.
- Switch for the selection of the SLPR-E interconnection with the next data supervisor or other supervisor extension.
- Protection against short-circuit or overcurrent, by fuse.
- Supplied with a pass-through rubber at the cable inlet and outlet, as well as prepared for adaptation and use of cable glands (optional).
- Protection degree: IP50.
- Attachment: case bottom (internal)
- Facilitates the installation of the MCDPR system, and can be performed by the user him/herself.
- For more information see the Installation Manual in our site.
