

# SLPR Management Software – SOFT-GER (Line MCDPR)

PRODUCT: SOFT-GER-MCDPR-V5.601

TECHNICAL SHEET 1/2

Customer Service: 55 11 3019-1616

Refer to the Installation Manual for more details

## • DESCRIPTION

The *SOFT-GER-MCDPR-V5.601* software version 5.601 manages SLPR-E equipment, running on PC® microcomputers. It enables several required operations for a good performance of the *MCDPR* system, and provides the user with a very useful tool for data processing – in order to optimize and improve the production performance. It runs on a Windows environment.

## • MINIMUM REQUIREMENTS

- PC® microcomputer (Pentium III or better)
- SVGA color monitor
- 256 MB of RAM
- 20 GB hard disk
- CD ROM drive
- 232 serial port
- Windows 98, 2000, NT 4.0 or XP (32 bits)
- UPS (recommended)

PC® - IBM registered trademark

## • OPERATION

This software is very easy to install. The user works with pop down menus, and dialog boxes provide a proper guidance during the several operations.

All collected data are recorded in a text-formatted database, which allows using it with other software items or utilities. Some examples of collected data: manufacturing or service order, operator, start and end of manufacturing order, part counting, stops or miscellaneous events, manufactured or rejected quantities, event time periods, etc.

The *SOFT-GER-MCDPR-V5.601* enables conducting the following operations:

SELCON SISTEMAS ELETRÔNICOS DE CONTROLE LTDA.

# SLPR Management Software – SOFT-GER (Line MCDPR)

**PRODUCT: SOFT-GER-MCDPR-V5.601**

**TECHNICAL SHEET 2/2**

☎ Customer Service: 55 11 3019-1616

Refer to the Installation Manual for more details

1. *basic software configurations*
  - a. selection of COM communication channel.
  - b. network address of SLPR-E.
  - c. storage directories for import/export files.
2. *remote*
  - a. reading and writing to the SLPR-E – it delivers the several commands and collects the production data, which are saved in text files.
  - b. monitoring – it monitors the SLPR-E states, indicating any kind of error. Any regular or errored operation is properly logged.
3. *selection of directories for data files (export/import)*
  - a. export – the collected data are saved in this directory as text files, in chronological order.
  - b. import – this directory contains the SLPR-E's data input consistency files, which are usually prepared by the PCP, in order to avoid data entry errors by the operator.
4. *help system*
  - a. the help system allows accessing all data and operation ways of the software, equipment and system.
5. *customization*
  - a. the software enables customizing several events, such as: messages; usage fields; data entry mode & order; and others (under request).

## • APPLICATION SOFTWARE

SELCON provides also more complete software items, usually developed along with database applications or spreadsheets (Access, Excel). They are really cost-effective for certain applications.  
(code: SOFT-APL-MCDPR-V□□□□□□).
